GRĂDINA BOTANICĂ UNIVERSITARĂ DIN TÂRGU MUREŞ, JUDEȚUL MUREŞ, ROMÂNIA

Informații generale

Grădina Botanică Universitară a fost înființată în 1948, împreună cu Facultatea de Farmacie, la inițiativa și sub îndrumarea profesorului de Geografie și Științe ale Naturii de la Școala Gimnazială Romano-Catolică din Târgu Mureș, dr. István Jablonkay (1913-2000). În 1948, a fost invitat să organizeze și să conducă Disciplina de Botanică Farmaceutică a facultății. Conferențiar dr. István Jablonkay a fost șeful acestei discipline între anii 1948-1952. Grădina de Plante Medicinale a fost înființată în același an (1948) sub îndrumarea profesorului universitar dr. Elemér Kopp (1890-1964), ultimul director al Stațiunii Experimentale de Plante Medicinale din Cluj (desființată în 1945). Elemér Kopp a fost șeful disciplinei de Farmacognozie până la pensionare în 1961.

Grădina Botanică Universitară este situată la poalele Platoului Cornești și are următoarele sectoare:

- *Parcul Dendrologic* (5 ha): înființat în 1908; clădirea pe vremea aceea găzduia Școala Militară Imperială și Regală din Târgu Mureș;
- *Sistematica plantelor și Zona de Stejăriș* (1,5 ha):
 - sectorul sistematic a fost proiectat de Cseh Halmágyi Anna în perioada 1951-1953 și adăpostește peste 600 de taxoni care se încadrează în 34 familii de plante;
 - Zona de Stejăriș face parte din pădurea de foioase seminaturală Platoul Cornești;
 - în acest sector au fost introdusi și aclimatizați peste 50 de taxoni amenințăți la nivel internațional și național sau taxoni rari;
- *Plante medicinale* (3300 m²): în aceast sector se află peste 200 de taxoni de plante medicinale;
- *Sere*: cele două sere (cu o suprafață de 92 m², respectiv 200 m²) sunt utilizate pentru obținerea materialului vegetal necesar plantării unor specii ornamentale în spații exterioare sau pentru iernarea unor plante alohtone (tropicale, subtropicale și mediteraneene).

UNIVERSITY BOTANICAL GARDEN OF TÂRGU MUREŞ, MUREŞ COUNTY, ROMANIA

General information

The University Botanical Garden was founded in 1948, along with the Faculty of Pharmacy, at the initiative and guidance of Dr. István Jablonkay (1913-2000), teacher of Geography and Natural Sciences at the Roman Catholic Secondary School from Târgu Mureş. In 1948, he was invited to organize and lead the Discipline of Pharmaceutical Botany at the Faculty of Pharmacy. He was the head of the discipline between 1948 and 1952. The Garden of Medicinal Plants was established in the same year, under the guidance of Professor Dr. Elemér Kopp (1890-1964), the last director of the Experimental Station of Medicinal Plants from Cluj (closed down in 1945). He was the head of the Pharmacognosy discipline until his retirement (1961).

The Botanical Garden is located at the base of the “Corneşti Plateau” and has the following sectors:

- *The Dendrological Park* (5 ha): founded in 1908, at the time when the building (of the University) hosted the Imperial and Royal Military School from Târgu Mureş;
- *The Systematic Sector and The Oak Forest* (1.5 ha):
 - The Systematic Sector was first designed by Cseh Halmágyi Anna during 1951-1953 and accommodates more than 600 taxa included in 34 families;
 - The Oak Forest is part of the semi-natural deciduous forest of “Corneşti Plateau”;
 - this sector gives shelter also for more than 50 internationally and nationally threatened and rare plant taxa, introduced and acclimatized in the Botanical Garden;
- *The Medicinal Plants Sector* (3300 m²): with more than 200 medicinal plant taxa;
- *The Greenhouses*: two greenhouses (with a surface of 92 m² and 200 m², respectively) are used to produce ornamental species for outdoor planting and also for hosting the tropical, subtropical and Mediterranean taxa.

DATE CLIMATICE ȘI GEOGRAFICE GEOGRAPHIC AND CLIMATE DATA

Geographical Position

East longitude: 24° 32'

North latitude: 46° 32'

Altitude: 308 m

Precipitation

Annual average (over 10 years): 615.4 mm

Maximum rainfall (1912): 987.01 mm

Minimum rainfall (1946): 331.1 mm

Temperature

Annual average (over 10 years): 8.8°C

Maximum annual average (1994): 10.4°C

Minimum annual average (1931): 6.6°C

Absolute maximum temperature (1936): 39°C

Absolute minimum temperature (1942): -32.8°C

The warmest month (1946): August, 22.9°C

The coldest month (1940): January, -11.8°C

Semințele recolțate de la plantele cultivate în Grădina Botanică Universitară din Târgu Mureș sunt rezultatul polenizării libere.

The collected seeds from the cultivated plants in the University Botanical Garden of Târgu Mureș are the result of open pollination.
